User manual

MOTOR electric slatted base (code FU-ROS-272)

SAFETY – READ BEFORE USE

- ! Keep hands and feet out from under the base and between its parts while it moves. Children and pets must not play under it.
- ! Children must not operate the base. Keep the hand control out of their reach.
- ! Use only the power supply supplied. Unplug it before cleaning or moving the base.
- ! Do not sit or stand on the raised head or foot section.

Getting started

1. Screw the six legs into the frame (or lay the base without legs into a bed).
2. Plug the motor cable into the power supply and the supply into a 230 V socket.
3. Put a 9 V battery (not included) into the motor housing: it lowers the base flat in a power cut.
4. Plug in the hand control and try every position without the mattress.

Hand control

1	head section up
2	head section down
3	foot section up
4	foot section down
5	both sections flat

A section moves while you hold its button and stops where you let go.

Emergency lowering

In a power cut press button 5: the 9 V battery lowers both sections flat. Replace the battery once a year.

Technical data

Power	230 V~ / 50 Hz, 29 V DC supply
Standby power	under 0.5 W
Motors	2 × 6,000 N
Duty cycle	at most 2 minutes running, then 18 minutes rest

Protection	IP20, dry indoor rooms only
Load	130 kg

Disposal

The motor, power supply and hand control are electrical waste; take the battery to a battery collection point.

Maker

Dream Sleep (sample maker). A sample document: it shows how a shop can add a downloadable file to a product. The maker is a sample one and the figures are for show only.
